JOURNAL OF MOLECULAR STRUCTURE, VOLUME 214 (1989)

SUBJECT INDEX

Acyl chains,
Conformational analysis of long acyl chains in solid and liquid thin films: polarization and decomposition of the ν (CH) Raman band, 71
Amino acid carboxylic groups,
Some structural aspects of protein–nucleic acid recognition point mechanisms involving amino acid carboxylic groups, 15

Bacteriorhodopsin,
Photoisomerization in bacteriorhodopsin studied by FTIR, linear dichroism and photoselection experiments combined with quantum chemical theoretical analysis, 257
Picosecond time-resolved resonance Raman spectrum of the K-590 intermediate in the room temperature bacteriorhodopsin photocycle, 289

DNA,
UV photoelectron and quantum mechanical characterization of DNA and RNA bases: valence electronic structures of adenine, 1,9-dimethylguanine 1-methylcytosine, thymine and uracil, 315
DNA structure,
DNA structure studies by resonance Raman spectroscopy, 43
Dopaminergic D2 antagonists,
Molecular structure of two gastrokinetic compounds, cisapride and R53757: comparison with dopaminergic D2 antagonists, 159
Dynorphin A-(1–13),
The conformation of dynorphin A-(1–13) in aqueous solution as studied by Fourier transform infrared spectroscopy, 143

Elastase,
Pressure effects on the Raman spectrum of proteins: stability of the salt bridge in trypsin and elastase, 305

Gastrokinetic compounds
Molecular structure of two gastrokinetic compounds, cisapride and R53757: comparison with dopaminergic D_2 antagonists, 159

Heme enzymes,
Towards a unified concept of oxygen activation by heme enzymes: the role of the proximal ligand, 149
Heme Fe(IV)=O groups,
Resonance Raman characterization of heme Fe(IV)=O groups of intermediates of yeast cytochrome c peroxidase and lactoperoxidase, 27

In vivo Raman spectroscopy,
In vivo Raman spectroscopy of human, animal and artificial ocular lenses, 111

Lactoperoxidase,
Resonance Raman characterization of heme Fe(IV)=O groups of intermediates of yeast cytochrome c peroxidase and lactoperoxidase, 27
Lipids,
Fourier transform infrared spectroscopic studies of lipids, polypeptides and proteins, 329
Lipopolysaccharide membranes,
New insights into the phase behavior of a complex anionic amphiphile: architecture and dynamics of bacterial deep rough lipopolysaccharide membranes as seen by FTIR, X-ray, and molecular modelling techniques, 213

Nucleic acids,
Conformational transitions of nucleic acids

studied by IR and Raman spectroscopies, 185
Raman study on a model system for the interaction of proteins with nucleic acids: lysine–tyrosine–lysine and polyriboadenylic acid, 247
Nucleoside interactions,
Structural aspects of group I metal ion–nucleoside interactions, 177

Ocular lenses,
In vivo Raman spectroscopy of human, animal and artificial ocular lenses, 111

N-(Pentafluorobenzoyl)glycine,
Structure of enzyme-bound substrates: resonance Raman and kinetic evidence for differential enzyme–substrate contacts in *N*-(pentafluorobenzoyl)glycine dithioacyl and thioacyl papain, 1
Phospholipid monolayer films,
The interfacial structure of phospholipid monolayer films: an infrared reflectance study, 93
Polypeptides,
Fourier transform infrared spectroscopic studies of lipids, polypeptides and proteins, 329
Protein–nucleic acid recognition point mechanisms,
Some structural aspects of protein–nucleic acid recognition point mechanisms involving amino acid carboxylic groups, 15
Proteins,
Fourier transform infrared spectroscopic studies of lipids, polypeptides and proteins, 329
Raman study on a model system for the interaction of proteins with nucleic acids: lysine–tyrosine–lysine and polyriboadenylic acid, 247

RNA,
UV photoelectron and quantum mechanical characterization of DNA and RNA bases: valence electronic structures of adenine, 1,9-dimethylguanine, 1-methylcytosine, thymine and uracil, 315

Thiocyl papain,
Structure of of enzyme-bound substrates: resonance Raman and kinetic evidence for differential enzyme–substrate contacts in *N*-(pentafluorobenzoyl)glycine dithioacyl and thioacyl papain, 1
Triglycine,
Vibrational analysis of crystalline triglycine, 119
Trypsin,
Pressure effects on the Raman spectrum of proteins: stability of the salt bridge in trypsin and elastase, 305

Yeast cytochrome c peroxidase,
Resonance Raman characterization of heme Fe(IV)=O groups of intermediates of yeast cytochrome c peroxidase and lactoperoxidase, 27
